SUMMARY

.NET backend engineer with 3 years building production **ASP.NET Core** services across healthcare, billing, and program-monitoring platforms. Focused on **event-driven, serverless** systems on **.NET 8** and **AWS**, with **MongoDB, SQL Server**, and **EDI 837P** claim integration.

EXPERIENCE

Associate Software Engineer

May 2025 – Present

Kaz Software, Dhaka, Bangladesh.

ExpertEVV – Electronic Visit Verification

- Core contributor to a **multi-service .NET 8 + AWS Lambda** platform (**MongoDB**) serving **~3–4k active users**
- Root-caused a **production defect** silently rejecting **insurance claims**, unblocking billing for affected agencies
- Rebuilt **visit syncing** (HHAExchange) into an **async, event-driven pipeline** on **AWS Step Functions**
- Built an **EDI 837P** (ANSI X12) **claim export** with diagnosis coding and unit/charge calculation
- Automated **invoice generation** and **PDF/finance exports**, replacing manual spreadsheet billing

GNB MIS – Program-Monitoring API

- Built features on a **.NET 6 / Clean Architecture** API serving **10k+ users**
- Fixed a **data-integrity bug** in completion reporting, scoping reports correctly and blocking duplicate submissions
- Hardened the **beneficiary Excel export** to skip malformed records instead of failing the whole file
- Added **permission-based access control** (**JWT**) to sensitive reporting endpoints

Software Engineer

Nov 2023 – Apr 2025

Coppanet Ltd, Dhaka, Bangladesh.

SoowGood – Telemedicine Platform

- Independently built the **Admin Module** end-to-end (**ASP.NET Core + Angular**) as a separate app from the patient-facing site
- Delivered **authentication** (**ASP.NET Identity**), **appointment scheduling**, and **video consultation** on **EF Core / SQL Server**
- Led the team through final delivery on a platform serving **20k+ registered users**

FirstStudy – Coaching & Student Management

- **Sole developer** modernizing an inherited **legacy system** for **10–12 institutes** and **3,000+ students**
- Refactored unstable modules and optimized **EF Core / LINQ** queries while keeping it live

Intern Software Engineer

Apr 2023 – Jul 2023

Quad Theory Ltd, Dhaka, Bangladesh.

- Built a demo **ASP.NET Web API** (frontend, backend, database)
- Added features to a live **ASP.NET MVC + AngularJS** product

EDUCATION

B.Sc. in Computer Science & Engineering

East Delta University

CGPA: 3.67 / 4.00

THESIS

Type-2 Diabetes Gene Detection using Explainable AI

Final-Year Thesis – East Delta University

- Detected genes responsible for Type-2 diabetes and suggested personalized treatments using **machine learning** and **LIME** (explainable AI)
- Focused on identifying specific diabetes-causing genes to enable targeted, individualized solutions

TECHNICAL SKILLS

Languages:	C#, SQL, TypeScript, JavaScript, Python
Backend:	ASP.NET Core (Web API, MVC), .NET 6/8, EF Core, LINQ, ASP.NET Identity, REST APIs, DI, async/await
Frontend:	Angular, Angular Material, Bootstrap, HTML, CSS
Databases:	SQL Server, MongoDB
Cloud/DevOps:	AWS (Lambda, API Gateway, Step Functions, EventBridge, SQS, S3, Cognito), Git, GitHub
Practices:	Clean Architecture, microservices, event-driven & serverless, background jobs, JWT/Cognito auth, EDI 837P, automated testing

CERTIFICATIONS

AI Fluency: Framework & Foundations

Anthropic • Oct 2025

ASP.NET Core MVC with Angular & EF Core

PencilBox Training Institute • Mar 2022

Professional Programming with C#

Dev Skill • Jun 2021
